AT KidSystems brings to market state-of-the-art learning tools with launch of Cosmo's Learning Systems product line

AT KidSystems officially launched its inaugural product line – Cosmo's Learning Systems, featuring Mission Control and Cosmo's Play and Learn Software. Closing The Gap's 23rd Annual Conference in Minneapolis, MN, served as the setting for the formal roll out of Cosmo's Learning Systems.

"Closing The Gap was the ideal venue for introducing the assistive technology community to the Cosmo's Learning Systems. We recognized a need and put our talents together to bring this incredible product to market for young children with and without disabilities," explained Dr. Corinna E. Lathan, Chief Executive Officer of AT KidSystems and founder and Chief Executive Officer of Anthro-Tronix, Inc. "Cosmo's Learning Systems successfully gives teachers and therapists a well proven set of tools to motivate, teach and entertain young minds, while delivering unmatched data-gathering proficiencies vital to tracking children's progress and attaining established learning goals."

Cosmo's Learning Systems is designed to support the educational and rehabilitative goals of children of developmental ages

two to eight years. The technologically advanced suite of innovative learning tools features Mission Control and Cosmo's Play and Learn Software's first product, "Playground Discovery." Mission Control is a unique, multi-functional computer access device equipped with four large state-of-the-art aFFx activators, a built-in microphone and eight external ports to accommodate any additional sensors or attachments. Cosmo's Play and Learn Software showcases virtual character Cosmo and encourages children to share its many adventures through Mission Control.

"A dedicated team effort... Cosmo's Learning Systems is the culmination of the merging of technology with the exceptional expertise of specialists in physical, occupational and speech-language therapy, assistive technology and education," said Judd Nathanson, President of AT KidSystems. "After months of hard work perfecting our first product line, we are officially open for business with the sale of Cosmo's Learning Systems. The reward for us comes in knowing the tremendous impact that Cosmo's Learning Systems will

have on the future of children with and without disabilities."
